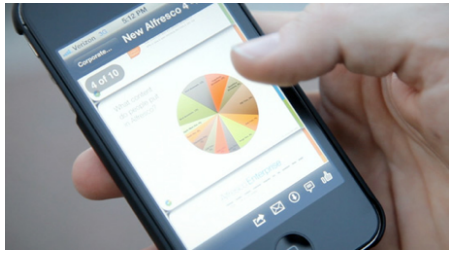
In Content Chaos?

Alfresco Hybrid : Ending Content Chaos Securely

Denis Dorval, VP Emea & Apac

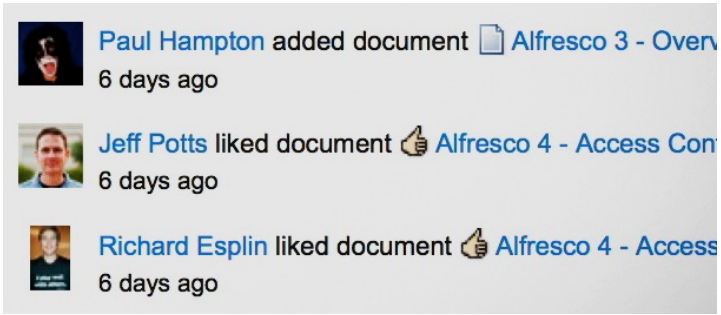
Open Source Summit, Moscow – 12 April 2013

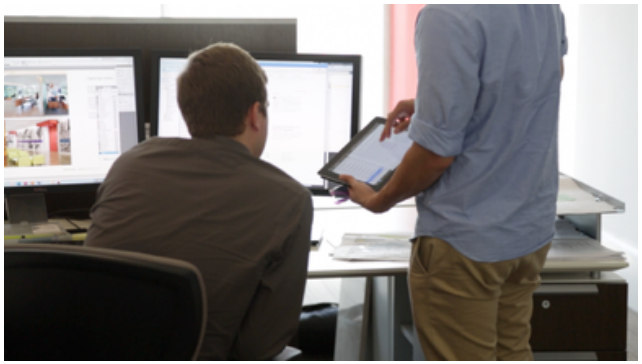
Content : New Challenges



Access to **business content** from anywhere on any devices

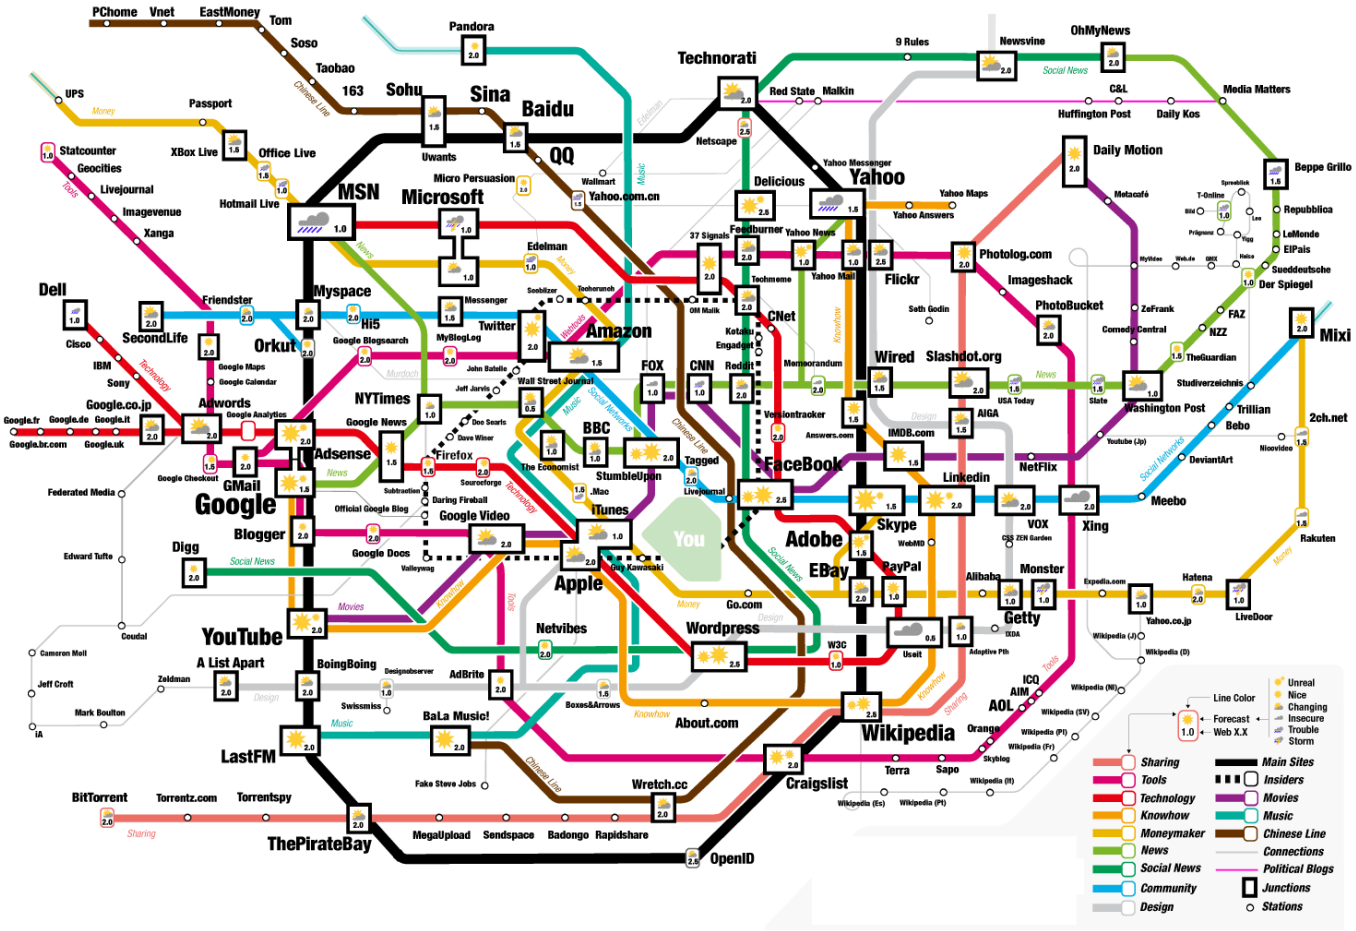
Easy to use, cloud-like apps



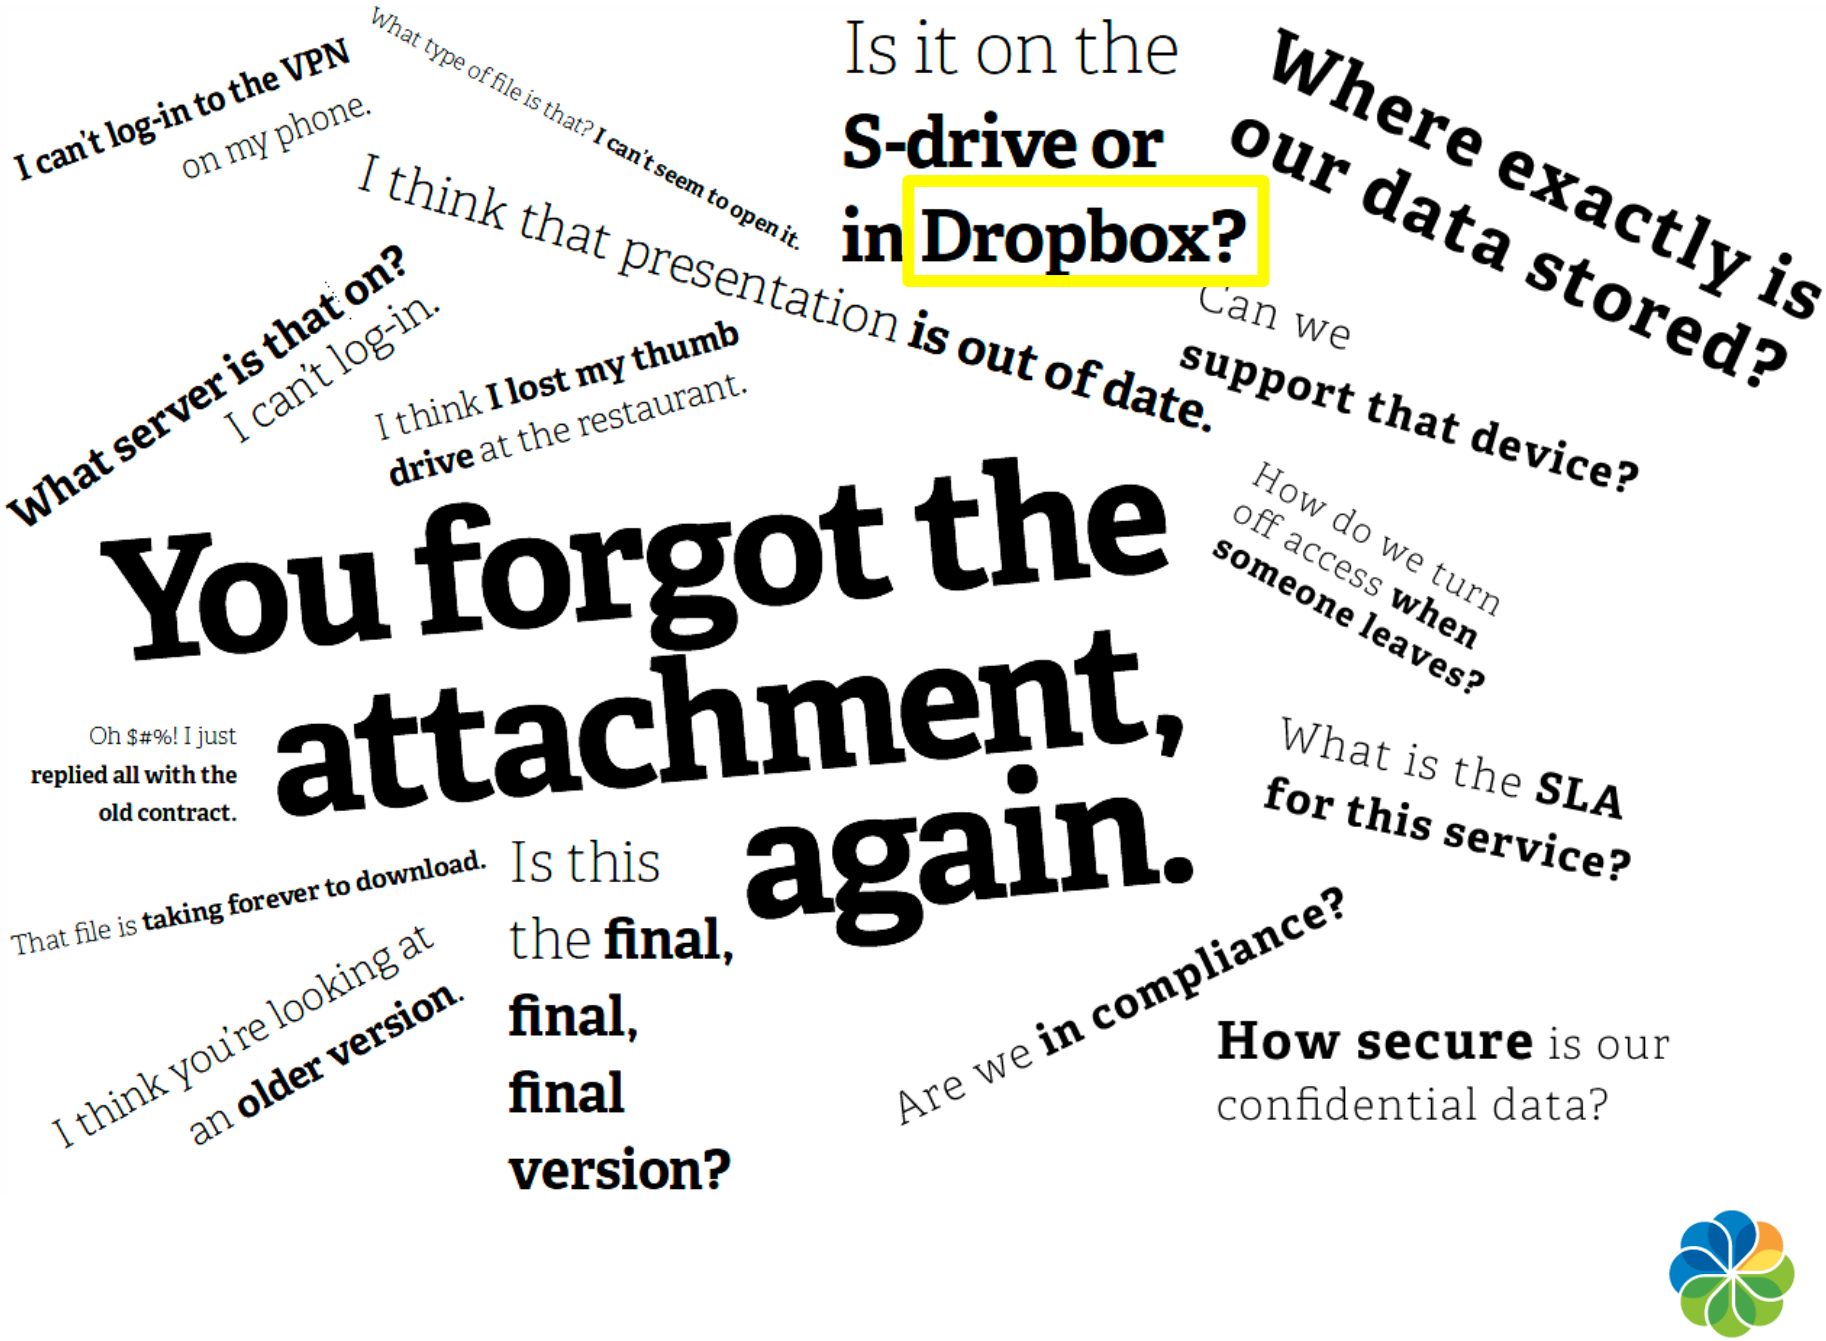


Easy to share content and **collaborate** with colleagues

Your enterprise content is in here somewhere.



(it's time for a new approach to content management)



I can't log-in to the VPN on my phone.
What type of file is that? I can't seem to open it.
Is it on the S-drive or in Dropbox?
Where exactly is our data stored?
What server is that on? I can't log-in.
I think that presentation is out of date.
Can we support that device?
I think I lost my thumb drive at the restaurant.
You forgot the attachment, again.
How do we turn off access when someone leaves?
Oh $#%! I just replied all with the old contract.
What is the SLA for this service?
That file is taking forever to download.
Is this the final, final, final version?
I think you're looking at an older version.
Are we in compliance?
How secure is our confidential data?

The open platform for business-critical content management and secured collaboration.

do and share great work.
